

### Local wild plants

Can you recognise ...

- A Daisy
- A Dandelion
- A clover
- A Buttercup
- An Oak tree
- A holly tree

### Common garden plants

Can you recognise ...

- A Rose
- A primula
- A Daffodil
- A Tulip
- A Sunflower
- A Snowdrop

### Sticky knowledge:

In our local area there are lots of different plants with different names.

We can recognise these plants by their key characteristics (colour, leaf shape, number of petals etc).

Plants all have similar parts but they can look very different from each other.

Some trees keep their leaves all year round and others drop their leaves in autumn and grow them again during spring.

### Remember:

- A tree is a plant.
- Blossom is a flower.

## Plants

Can you..?

Sort and group parts of plants by similarity and difference?

Can you use a simple chart to identify a plant?

Can you talk about how plants change over time?
